

# Turn MRI scans into measurable tumor change.

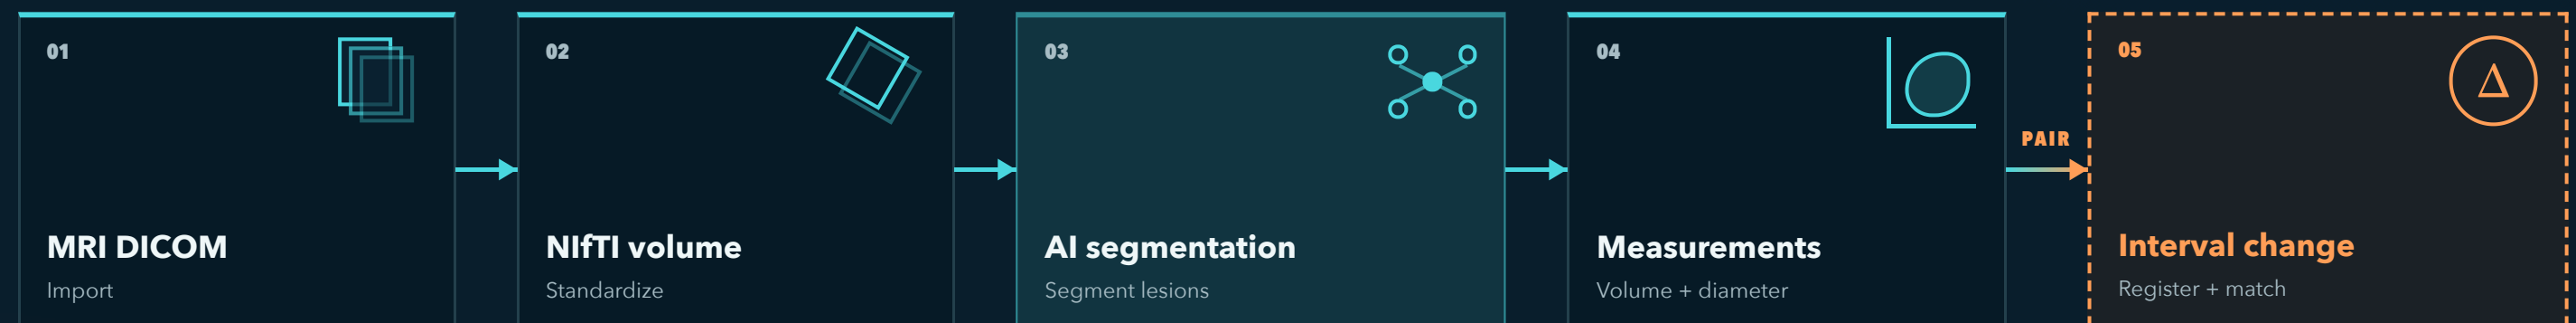

Detect, segment and measure bone tumors - then compare across time.

**THE PROBLEM** Visual MRI comparison is subjective.

—————> **THE SHIFT** OncoFlow makes lesions measurable and traceable.

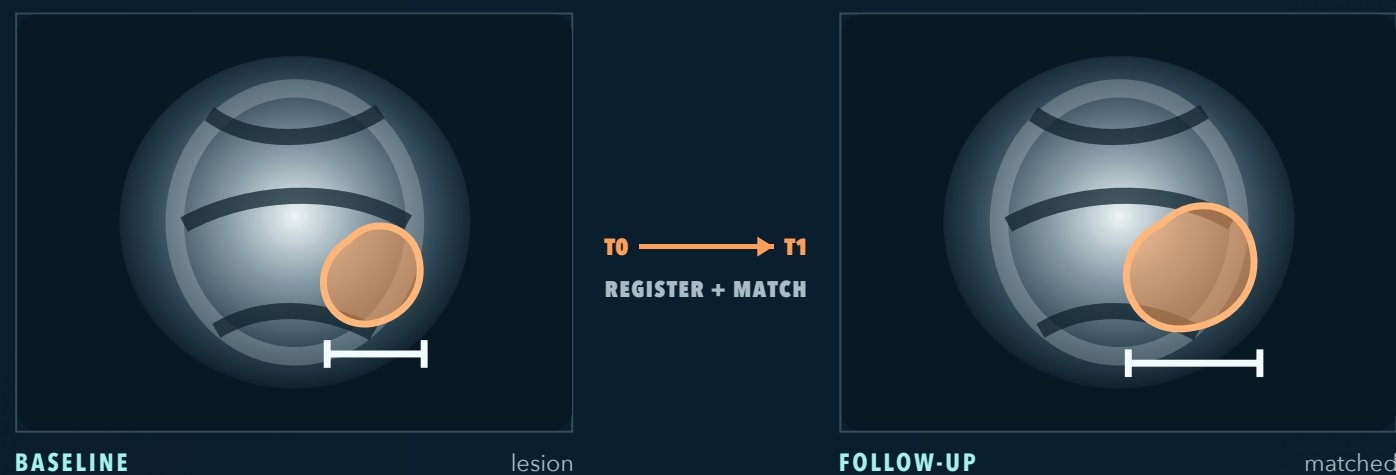

## HOW IT WORKS One clear path from scan to insight

**IMPLEMENTED** single scan

**PAIRED MRI - NEXT**

See what changed.  
**Measure how much.**

**QUANTIFY**

**What changed?**

Δ Volume

Δ Diameter

Lesion status

**01 Traceable**  
Source-linked results.

**02 Reviewable**  
Human review stays essential.

**03 Privacy-aware**  
De-identified workflows.
