

Turn MRI scans into measurable tumor change.

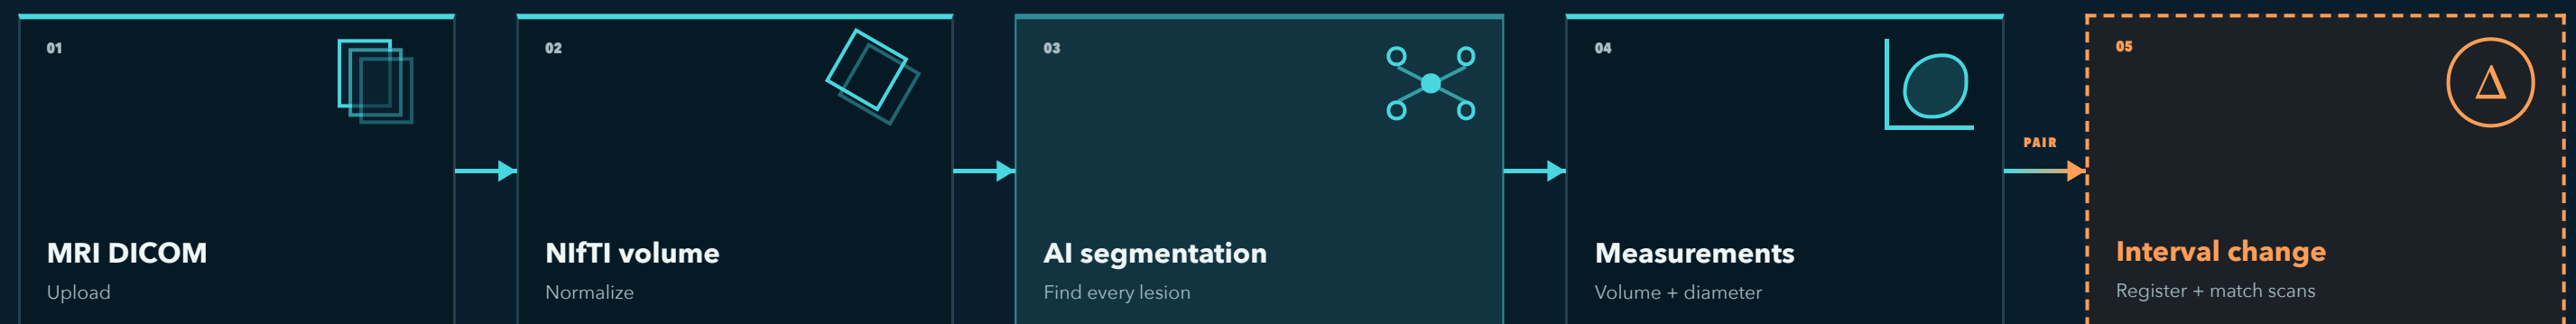

Detect, segment and measure bone-related tumors - then compare them across time.

THE PROBLEM MRI follow-up relies on visual comparison.

→ **THE SHIFT** OncoFlow makes each lesion measurable, traceable and ready to compare.

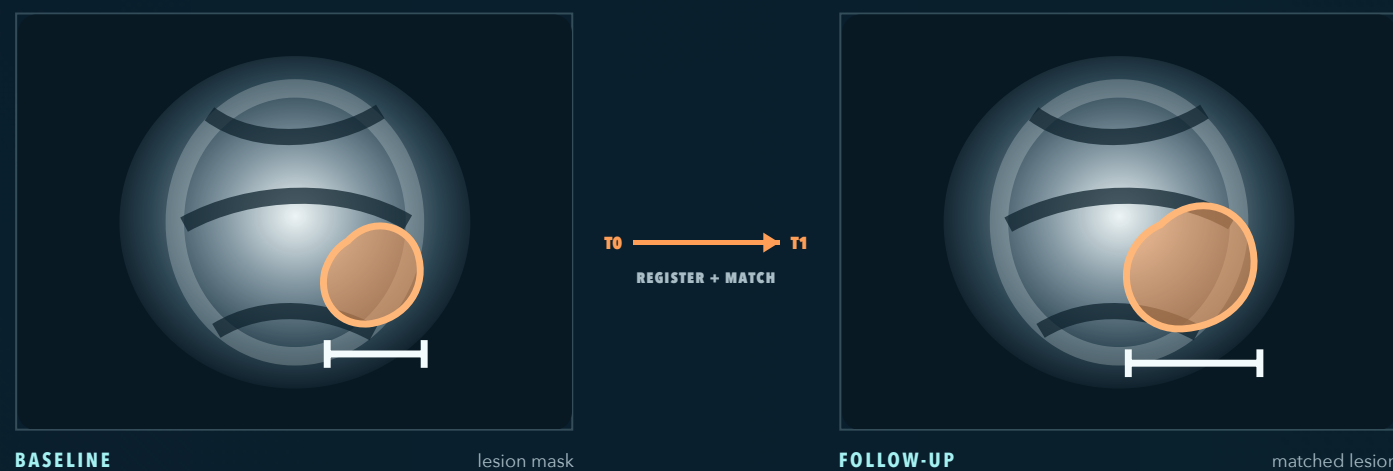

HOW IT WORKS One clear path from scan to insight

IMPLEMENTED single-scan foundation

PAIRED MRI - NEXT

Measure how much.

QUANTIFY

What changed?

Δ Volume

Δ Diameter

Lesion status

01

Traceable

Every result keeps its image lineage.

02

Reviewable

QC signals keep people in the loop.

03

Privacy-aware

PHI-safe outputs and de-identification boundaries.
